XM is a pay service and decisions related to the service being provided should remain in the hands of the subscribers. The NAB should not dictate what services are provided on XM radio. I find the instant information for traffic and weather to be of great use and potential productivity enhancer for reducing my commuting time to work. The radio does not offer a similar service due to the corporate advertisement congested airwaves that I pay monthly to avoid. I urge you to reject NAB petition 04-160.
